

**HASSELL ranked number 1 in Australasia and 25 in the 2010 World Architecture Top 100**

Over the last 15 years, the World Architecture survey of global practices, published in association with the London-based Building Design magazine, has become the leading indicator of how the global architectural profession is developing. In the 2010 report, HASSELL has been ranked number 25 in the world's 100 biggest practices.

HASSELL is a multidisciplinary design practice with studios throughout Australia and the Asia Pacific region. We are ranked number 1 in Australasia. HASSELL is in the

top 10 in various market sectors – Business Parks/Offices; Criminal Justice; and Transportation. In areas of expertise, it is in the top 10 for Interior Design and Landscape Architecture.

Our strong position is as a result of the expertise, design talent and commitment we offer our clients in the region. Our scale provides the capacity to deliver a broad range of projects, from small crafted commissions right through to some of the largest most complex developments in Australasia. Whilst scale isn't everything we believe it reflects our success in working with our clients to achieve great outcomes.
